

DHI FEFLOW TRAINING IN BEIJING IN CHINA

On 23-26 April 2012, DHI China hosted a DHI FEFLOW training course with 25 trainees in Beijing Experts Apartment of Ministry of Science and Technology (MOST).

This training course contained a one day seminar of numerical simulation of groundwater and three-day training for FEFLOW 6.0. During the seminar, many national experts on groundwater gave lectures on topics such as:

- “European Union Water Resources Management Experiences”
- “Interpret of Groundwater Environmental Impact Assessment Guidelines”
- “FEFLOW Simulation and Practice in Groundwater”
- “Groundwater Vulnerability Assessment and Protection Zone Delineation”

The training course was given by Dr. Tian Jinghong and Dr. Lu Zhihua, who are both senior groundwater engineers. The course participants, who mainly came from research institutions, have all gained much more than just some software skills about DHI FEFLOW (6.0 Version). DHI China would like to take this opportunity to express their great appreciation to all participants for their support to the staff of DHI China. If you have any problems using the software or have any ideas and advices for improvements, please tell us at any time.

Dr. Tian, Jinghong and Dr. Lu, Zhihua are giving lessons to the participants

Groundwater engineer Mr. Wang Weishi is helping trainees
